Relevant Experience

Senior Robotic Process Automation Analyst   2023 – Present
ONEOK   Remote, OK
- Designed and developed end-to-end automation solutions using low-code/no-code platforms, owning the product lifecycle from ideation to deployment and improving process efficiency across business units.
- Managed the ongoing optimization and performance tracking of automations, using data to drive continuous improvement and ensure long-term solution reliability.
- Collaborated closely with IT to manage the infrastructure and support of automation tools, ensuring seamless integration, system stability, and alignment with business needs.
- Acted as the primary product owner for automation initiatives, overseeing stakeholder communication, gathering requirements, and guiding user onboarding to new solutions.

Senior Data Product Analyst   2021 – 2023
Daimler Truck North America   Remote, OR
- Successfully led a cross-functional team of data scientists and engineers in developing cutting-edge AI tools utilizing machine learning techniques.
- Executed precise queries to ensure accurate data reporting and efficiently managed a vast database and internal applications.
- Implemented and maintained over **30,000** compatibility rules within database structures, optimizing data organization and accessibility.

Valuation Analyst   2019 – 2021
Tax Advisors   Vancouver, WA
- Assessed, evaluated, and analyzed quantitative and qualitative data sources to independently forecast and establish an adjusted property value.
- Conducted market research to compare client properties to the value of recent sales.

Business Analyst   2017 – 2019
JB Hunt Transport   Lowell, AR
- Spearheaded the development of automation solutions that drove **$800,000** in annual savings, optimizing workflows, enhancing data quality, and streamlining daily operations across teams.
- Delivered training sessions and led workshops to onboard employees, ensuring seamless adoption of automation tools and processes.
- Led automation initiatives for daily and weekly reporting across **100+** projects, saving **50,000** man-hours and enhancing operational efficiency.
- Drove high-impact automation projects for C-suite executives, impacting over **124,000** employees, while contributing to market and business analysis for technical advancements.

Certifications

UiPath Certified Professional Automation Developer Associate Certification, April 2024

Education

Data Analytics Boot Camp: University of Oregon, Eugene, OR
BS in Management, Minor in Economics: University of Arkansas, Fayetteville, AR
